

gprolog-utf8-tree/src
/BipsPI/t_c.c

```
graph TD; A["gprolog-utf8-tree/src  
/BipsPI/t_c.c"] --> B["stdio.h"]; A --> C["stdlib.h"];
```

The diagram illustrates a file dependency or inclusion. A gray rectangular box at the top contains the file path `gprolog-utf8-tree/src/BipsPI/t_c.c`. Two blue arrows originate from the bottom of this box and point downwards to two separate white rectangular boxes. The left box contains the text `stdio.h` and the right box contains the text `stdlib.h`. This indicates that the source file `t_c.c` includes or depends on both `stdio.h` and `stdlib.h`.
